

Demo Agenda - 15-Minute Briefing

The 15-minute arc

0:00-0:30

Landing & login

Dashboard: workspaces, automations, approvals, capabilities. Login
admin@demo.local / demo-admin-password.

0:30-3:00

Multi-tenant LLM control

Open /llm; switch provider and model per workspace. Two tenants run
different models with zero cross-talk (provider isolation).

3:00-5:00

RAG & grounding

acme-health: ask a grounded question, show citations and the
enforcement gates (retrieval ≥ 0.78 , groundedness ≥ 0.90 , citations

5:00-7:00

Workflows & automations

acme-manufacturing: run a workflow, trigger an automation, show
execution history and metrics.

7:00-9:00

Human-in-the-loop

acme-finance: show a pending approval, approve it, watch the deferred
action execute.

9:00-11:00

Marketplace + MCP

Install a plugin, connect an MCP server, invoke a tool from chat.

11:00-13:00

Governance

gov-city: compliance profile, /ready gate, audit-chain integrity
check, SSO/SCIM config (redacted).

13:00-15:00

Evidence & pilot framing

Model registry with eval fingerprints, SBOM, DR drill. State honestly:
pilot-ready, not certified.

Run it live, or scroll to any step on request - the demo is fully scripted and idempotent.

Sector scenarios - the four seeded workspaces

acme-health | Healthcare

Diagnostics demo - mandatory human review + BAA
profile declaration. Demo data, not clinical
advice.

acme-finance | Banking

Fraud/risk scoring with human approval gates. No
autonomous lending or credit decisions.

gov-city | Government

RBAC, SSO, immutable audit, readiness gate.
CJIS/FedRAMP require agency processes.

acme-manufacturing | Manufacturing

Maintenance/logistics automation with the
condition engine (run_if, thresholds).

Before the briefing (5 minutes)

python3 scripts/prepare_demo.py # idempotent; re-run the morning of the demo

Evidence at hand: scripts/output/demo_ready.json, sbom.json, dr_report.json,
government_readiness.json

Never claim certification (FedRAMP/HIPAA/PCI/CJIS/SOC 2) - pilot-ready framing only
(docs/COMPLIANCE_READINESS.md).
